Intelligent Television

MATTEL ELECTRONICS

Intellivision™ Intelligent Television The home video system from Mattel Electronics that can change your family's life!

Have you ever wanted to learn a foreign language? Or design your own exercise program? Ever wished you had professional stock analysis? Or computing help for your personal finances?

Soon there will be a simple way to have these things and more. A way so revolutionary, it can change your family's life.

Intellivision.

Intellivision is the computer-based system by Mattel Electronics. Begin with the Master Component (available now) for entertainment and education, then add the Keyboard Component (available 1981) for programs of self-improvement and financial planning. A range of programs

designed to put a whole new world at your family's fingertips. And right on your own television screen!

Update your finances and unload an NFL bomb.

The Intellivision Family Financial Planner program helps you analyze, record and store your vital household financial information.

Use it as a money manager for your monthly bills, to estimate the appreciation on your home or the depreciation on your car, as a record for your income tax related information, to record your banking transactions, to create your family's budget and much more.

It's like having a personal accountant living in your home. With a perfect memory.

Now, get into the incredible action of the only officially licensed NFL Football video game. Life-like players and over 180 offensive and defensive plays put our football game in a league above the rest. Blitz is on...gotta scramble...throw...Touchdown!

Take French lessons and follow your personal exercise program.

Introducing a better way for you to learn French. Intellivision. It's a private lesson that can teach you the essentials of conversational French. "Comment allez-vous?" asks your TV in perfect French. "Comment allez-vous?" you repeat into the Keyboard microphone. Now you listen, first to the French voice, then yours. You compare, improve, perfect. Next time, your French sounds more French.

Now that you've stimulated your mind, let the Jack LaLanne Physical Conditioning program help shape your body. With an exercise program custom-tailored to fit your needs. And your goals. It even gives you progress reports. In a few short months, you'll be ready for any beach, including St. Tropez. **Kids sharpen up math skills and launch a galactic space attack!**

Here's a breakthrough. Kids can now watch TV and improve their math skills at the same time. The Electric Company Math Fun program starts the action. Two gorillas race alongside a jungle river while math problems pop onto the screen. Right answers keep a gorilla on his feet. Wrong answers...into the river! Our computer automatically grades

your kids through 18 increasingly difficult levels of addition, subtraction, multiplication and division. Since Intellivision is easy and fun, they can do it alone.

After learning comes more action, when Space Battle transports their imaginations into the stars. Squadron leader maps a strategy to protect Mother Ship from the aliens. Look out! Zap! Zap!

Simple to hook-up. Simple to use.

Intellivision system attaches to any TV, easily. Then, simply turn on the power, insert a cartridge or cassette and you're ready.

It's just that easy. We designed our programs to do the hard work for you. You respond in plain English. And you don't even have to know how to type. Plus, service on Intellivision is performed by the General Electric Factory Service Network. Simplicity of operation. Variety of programs. Convenience of service.

Together, they make Intellivision the one video system every member of the family can fully enjoy starting the day you bring it home.

Discover how Intellivision can change your family's life.

We invite you and your family to experience Intellivision in person. You'll see the full variety of programs we offer now and learn about the exciting new programs coming soon. The Intellivision computer-based home video system. See it demonstrated now. Find out how much it can do for your family.

Specifications

Master Component (For Color TV Viewing Only)

CPU: One 16 bit microprocessor

Memory: 7K internal ROM, RAM, 4K I/O structures, remaining 64K address space available for external programs.

Controls: Two 14-bit joysticks, 12 function movement key pad, four action keys, 16 direction object movement disk.

Sound: Sound generator capable of producing 3 part harmony.

Color: 16 colors.

Program Material: Accepts all Mattel video ROM cartridges.

Video Resolution: 192 vertical x 160 horizontal picture elements.

Master Component and Keyboard Component Combined

CPU: Two processor system

- 16 bit microprocessor/Master Component
- 8 bit microprocessor/Keyboard Component

Memory: 16K RAM resident (10 bit words) memory can be expanded up to 1000 64K pages (16 megabytes).

Keyboard: 60 key typewriter-like keyboard including specialized computer control keys (Upper/lower case).
